Guidelines for coding and submission of Assignment 2

Reproducibility

Because of the number of assignments to check, we need to use criteria which make it possible to verify your results in a timely manner. This means that all tables and figures you use in the report must be printed when your code runs, with an identifier. The following is an example of a well reported output:

--- LDA Box Office Regression (Table 5) ---

Call:

lm(formula = LogBoxOffice ~ 0 + ., data = data_reg_lda)

Residuals:

Min	1Q	Median	3Q	Max
-5.6653	-0.2721	0.4869	1.0885	2.9564

Coefficients:

	Estimate	Std. **Error**	t value	Pr(>|t|)	
Topic_1	14.88554	0.09064	164.2	<2e-16	***
Topic_2	17.55220	0.08928	196.6	<2e-16	***
Topic_3	19.40695	0.06415	302.5	<2e-16	***

Signif. codes: 0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1

Residual standard **error:** 1.721 on 30830 degrees of freedom

Multiple R-squared: 0.9903, Adjusted R-squared: 0.9903

F-statistic: 1.048e+06 on 3 and 30830 DF, p-value: < 2.2e-16

So, make sure that your tables and figures print, along with an identifier. You do not need to add any formatting to what R/Python prints by default. **Tables and figures that aren't correctly reported are treated as non-replicable, which will negatively impact your grade.**

Control code randomness

Because your code will use Random Number Generation (RNG) for sampling, it is important that your results can still be replicated despite this. This means that your code should give the same results every time, even though there are random elements present. To do this, simply use set.seed(1) in R or random.seed(1) in Python at the start of your code. Note that you can check this yourself by running the code twice and checking if your results match. **As before, if a table printed from your code does not match your report, your grade will be negatively impacted.**

Other

Please make your code in one programming language.

Make you pdf report in LaTeX, and submit it in the format **Assignment_2_STUDENTNUMBER.pdf**

The **page limit** is **15 pages**, excluding the appendix, which is unlimited. Note that you will be graded on the first 15 pages, and the appendix will only be consulted when relevant.
